JOB EXPERIENCE

Owner and founder of 'Libero', customized sports clothing, Tandil. APRIL, 2014 - JULY ,2020
I started this business doing silk-screen-printing on t-shirts at home. Then the business grew up and I started doing customized sports clothing. Along the path I learn how to sell, take a customer idea and bring it to the screen and then give him the final product fulfilling all their expectations.
Due to the current pandemic creating downturn of sports activities, I decided to start a Full Stack Web Developer career in Acamica and I feel passionate about it, that is why I am looking forward to getting my first IT job and keeping on learing to become a MERN developer.
Adaptable personality to easily become part of a work group and hard worker.
I think it's all about wanting to learn and putting it in practice.
